Working on your Goals in EdReady

From your dashboard, click **Go to Goal** to work on that goal. Click on the **Start diagnostic** button to begin building your personalized study path.

You will see a series of questions where you will be tested on your knowledge.

Don't worry if you don't know something – if you don't know the answer to a question, just use the **Skip** button to skip the question.

If you need to leave the test before you finish, click the **Save and close** link – you'll be able to finish this test at another time.

Once available, click the **View Study Path** button to see and work on the material you still need to work on. After you take the initial test, this is what you'll do to keep working in EdReady.

You can **Learn** any topic, allowing you to access online courses directly from EdReady. Once you're ready, **Test** your knowledge to see, letting you test what you have learned and Master material. Your performance on these Tests will update your EdReady score and your current status for the tested material.
