****2018** = NAACLS calculates the attrition rate as those who left voluntarily or involuntarily from the second half of the program. The MLT program started with 9 students in the second half of the program and still has 1 student enrolled, so no students have left the program for the 2018 graduation year. The graduation rate is calculated based on the number of graduates divided by the number of students starting the final half of the program minus the number of students still enrolled in the program. Since one student is still enrolled the graduation rate is $8/9-1 = 8/8 = 100\%$
